

# Pressed Flower Coaster/Paperweight

## Materials Needed

- "Pressed Flowers" Package by *Nature's Pressed*
- Clear Acrylic Coaster or Paperweight with removable backing. (Usually used with needle point designs)
- Small Craft Paintbrush
- White Glue
- Tweezers (Flat, Round tip is best.)

## Easy 5-Step Instructions

1. Remove flowers from package with tweezers. Store unused flowers in package for later use.
2. Remove backing paper from center insert of coaster/paperweight. Center insert will be "tacky".
3. Arrange flowers on table as desired. Carefully place and press each flower/greenery in desired position onto center insert.

—or—

Cut a circle from desired paper to match the size of center insert. Dot glue onto the backs of flowers/greenery then place them onto paper circle as desired.

4. Place the coaster/paperweight shell upside-down on the table. Place the insert upside-down into shell. Peel backing paper off cork bottom and attach to shell bottom.
5. Keep away from direct sunlight. This will allow the flowers to retain their color as long as nature allows.
