

Pressed Flower Memory Album

Materials Needed

- "Pressed Flowers" package by *Nature's Pressed* in colors to complement photos and album.
- Photo album of your choice
- Natural paper in color of your choice
- Paper cement or spray adhesive
- White glue
- Small craft paintbrush
- Tweezers (flat, round tip is best)
- Decoupage medium

Easy 5 Step Instructions

1. Cover outside of album with natural paper in color of your choice using either paper cement or spray adhesive according to manufacturer's directions. Allow to dry.
2. Remove flowers from package with tweezers. Store unused flowers in package for later use.
3. Using tweezers, pre-arrange flowers on album as desired. You may either use a paintbrush to dot glue underneath edges of flowers, or remove flowers and apply glue to back sides and re-arrange as desired. Make sure all edges are glued down securely. Allow to dry.
4. Apply decoupage medium in a thin layer with paintbrush over entire cover surface, starting in the center of the arrangement and working out to the edges. Allow to dry. Repeat if desired.
5. Embellish inside photo pages with pressed flowers of your choice to complement your photographs. Do not allow flowers to touch photos. You may want to make color copies of your photos to allow flowers to be placed directly on top of the pictures.
