

Pressed Flowers Scrapbook Page

Materials Needed

- * "Pressed Flowers" package by Nature's Pressed, to complement photos
- * Photos of your choice
- * Cardstock in color to complement photos
- * Photo-safe adhesive
- * Scissors
- * Tweezers (round, flat tip is best)
- * Small craft paintbrush

Easy 5 Step Instructions

1. Mat Photos onto cardstock as desired
2. Adhere matted photos onto scrapbook page of contrasting color.
3. Remove flowers from package with tweezers and pre-arrange on scrapbook page as desired
4. Adhere flowers to page by either using a small craft paintbrush to dot glue underneath edges or flowers, or remove flowers and apply small dots of glue to the back sides and re-arrange as desired
5. Allow glue to dry

Please be aware that all pressed flowers are NOT acid free, and therefore should not touch photos. Use a page protector on each page so that flowers do not touch opposite pages
